Barco

OPIS PRODUKTU

The FDU-2068 is an advanced 6x8 inch Flight Display Unit featuring two separate DVI digital video inputs. Equipped with the latest, sunlight-readable Active Matrix Liquid Crystal Displays technology, the FDU-2068 provides exceptionally high brightness and contrast along with an excellent viewing angle in all directions. This allows the same unit to be used in portrait as well as landscape orientation.

A versatile display

The innovative FDU-2068 display is level A DO-178B and DO-254 certified. As a consequence, it can be used as a Primary Flight Display (in combination with an external symbol generator) in almost any type of business aircraft. The use of advanced electronics results in a very compact footprint and low power consumption.

Features

- Up to 2 digital video inputs
- 24 line select keys
- Extra wide viewing angle
- Compact design and low weight
- Low power consumption
- Fully compatible with the MOSArt™ open system processing unit
- Provisions for dual ARINC 818
- Extensive Built-In Testing (BIT)
- ETSO/TSO C-113 certification on request
- DO-178B & DO-254 certified (level A)
