BARCO

Nazwa

**Barco MDU-254 5x4 inch avionics-grade
Mission Display Unit**

Cena

0,00 zł

Producent

Barco

OPIS PRODUKTU

The MDU-254 is an avionics-grade 5x4 inch Mission Display Unit derived from Barco's field-proven CHDD family. The MDU-254 has both a digital video input (DVI) and most of the currently available analog video inputs (composite PAL/NTSC, STANAG 3350, RS343 and/or RGB,...)

Excellent brightness and contrast

Equipped with the latest, sunlight-readable AMLCD technology, the MDU-254 delivers excellent brightness and contrast values.

Compatible with FLIR, daylight video cameras, moving maps, computers and radar, the MDU-254 Display Unit offers a dedicated imaging solution, wherever your mission takes you. The unit is DO-178B certified up to level C for the DVI input.

Features

5 x 4 inch VGA screen (> 125 dpi)

Multiple configurable inputs:

1 Digital video input (DVI)

Up to 6 analog video inputs
